

Revolutionize Supplier Management with dotSolved Supplier Portal

The dotSolved Supplier Portal is the answer to the future of supplier management, enabling smarter and more efficient supplier interactions. Deeply integrated with NetSuite and offering hybrid deployment flexibility, the Supplier portal offers a comprehensive solution for managing supplier relationships, enhancing communication and fostering collaboration. Discover the difference for yourself—request a demo and benefit from a 30-day free trial.

Customer Pain Points

- ▶ Inefficient workflows for suppliers and contract manufacturers in areas such as supplier qualification, onboarding, access to contracts and statutory documents, compliance, and approvals.
- ▶ Lack of real-time information exchange between supplier entities and sourcing organizations, hindering efficient and effective management of supply chain operations.
- ▶ Most Supply Chain Management (SCM) systems focus on procurement but often fall short in managing supplier relationships and communication throughout the product lifecycle.

Key Business Benefits

- ▶ Instant communication boosting productivity
- ▶ Faster issue resolution reducing downtime and costs
- ▶ Optimized procurement workflows simplifying administration for improved decision-making
- ▶ Improved transparency and oversight
- ▶ Efficient document sharing and cooperation
- ▶ Maximizes ROI through improved supplier communication processes

Key Features and Capabilities

- ▶ Streamlined supplier onboarding and communication
- ▶ Purchase order (PO) management
- ▶ Purchase requisition
- ▶ Compliance and risk management
- ▶ Approval management
- ▶ Reminder management
- ▶ Arena integration
- ▶ Master Production Schedule (MPS) management
- ▶ DocuSign integration
- ▶ Notification Rules for CMs and Suppliers
